# 2009 Weather Review

A normal 2008-2009 winter followed by a cool, wet late spring and hot, dry late summer created conditions for a mainly slow fire season with a flurry of activity towards the end.

Winter snowpack going into the fire season was fairly normal with normal snowmelt and runoff rates. The real anomaly came in June with record rainfall in Idaho and much below normal temperatures across the Great Basin.

This early surge of moisture, accompanied by cool temperatures kept fire potential quite low across the northern 2/3 of the area through August.

Little precipitation moved into southern Utah during July and August. Conditions were dry and warming across Utah going into September and October for late season high fire potential. Cold weather moved into the region late Oct/Nov for a gradual end to the 2009 fire season.

## Preparedness Level Review

2009 was the second consecutive year where the fire activity did not push the Preparedness Level to PL 4 or PL 5. This was also true for the National level as well. With a wet spring and agencies managing their fires without going to Type 1 or 2 Incident Management Teams the Preparedness Level remained at a PL 3 for most of the season.

## 2009 Fires Season Review

The 2009 fire season was the second consecutive quiet year for Eastern Great Basin. This slow year was generated by a wetter than normal spring and temperatures that remained cool through June and early July.

## Summary by State/Agency

The following charts and graphs describe the breakdown of fire activity by State and Agency showing the total number of fire starts and the total number of acres burned for the calendar year of 2009. This information was obtained through the daily FAMWEB records.

Utah had the most fire starts with 1,186 combined human and lightning ignitions for 112,753 acres consumed. However, it was the USFS and BLM with the bulk of the starts for the year with nearly 60% of the combined total.

## Large Fire Activity Review

Eastern Great Basin had 49 fires that reached the large fire criteria of 100 acres in timber or 300 acres in grass/sage. The first large fire of the season started on June 16<sup>th</sup> on USFS lands in the Dixie National Forest. The last large fire season occurred October 10<sup>th</sup> on BLM lands in the Twin Falls District.

## 2009 Prescribed Fire Review

Prescribed fires and acres burned by agency and unit as reported on the Daily Situation Report within the FAMWEB Program.

### BIA Prescribed Fire by Unit

The only unit that reported any prescribed fire activity for the BIA was the Idaho, Fort Hall Agency. This unit had two prescribed fires for 117 total acres.

### BLM Prescribed Fire by Unit

## Private and DDQ Prescribed Fire by Unit

## FWS Prescribed Fire by Unit

## NPS Prescribed Fire by Unit

## State Prescribed Fire by Unit

## USFS Prescribed Fire by Unit

## 2009 RESOURCE ORDERS SUMMARY

The statistics for the 2009 resource orders were pulled using the ROSS Summary reports database from COGNOS. The focus for this section is to show the number of resource orders that were placed through Eastern Great Basin. The requests for this report are separated into five categories; Aircraft, Crews, Equipment, Overhead and Supply.
